

Authentic

KITCHEN & BATH

A genuine "authentic" life starts in our home, which is a reflection of our own personality and experience. The human dimension is what turns our house into our home. It is a way of living constructed over time. It is the result of our actions, our decisions and our experiences.

New Iconic White

The beauty and purity of white

The beauty and purity of white transcends beyond multiple shades and spaces.

White is neutral but classic and provides a touch of brightness, expanding physical boundaries.

Integrity

More than **90% of Quartz**
100% **Innovation**

The Silestone® Sinks. Integration without joints.

A solution for those who want the best from their kitchen, the Integrity Sink combines all the advantages of Silestone® in a new and revolutionary product. It completes the cycle of perfection that the kitchen needs and it harmonizes every aspect.

Thanks to the 'one piece only' effect, the uniformity is obvious. Worktop and sink are joined in design and they are perfectly combined in order to prevent any disjointed areas.

In One Piece

ONE is the model that defines the concept of **Integrity**. A single sink, in one piece, measuring **41x51x15,5cm**. ONE is 1, with its curved outline, the perfect choice for lovers of fluid design and originality.

Integrity ONE

Straight Lines

DUE is available in three sizes: **DUE S: 37x34x15.5cm**, ideal for a double sink, **DUE L: 37x51x15.5cm** for a single sink, and **DUE XL: 43,5x67x21cm** with its big size. The perfect choice for those who see the simplicity of straight lines as the mark of style and beauty.

Advantages of Silestone®

Silestone® is a natural quartz surface developed and created to decorate today's kitchens and bathrooms in a range of attractive quartz colours, extraordinary quartz textures, and top-quality performance. It is the only one that guarantees maximum hygiene on its surfaces.

Resistant to Stains

Silestone® is a quartz surface that is highly resistant to staining from coffee, wine, lemon juice, olive oil, vinegar, make-up and many other everyday products.

Resistant to Acids

Quartz is one of the strongest minerals known to man. This makes our products extremely durable, with a high level of resistance to external aggressors.

Resistant to Knocks

The high level of resistance of Silestone® quartz worktops to knocks, far surpasses that of other products with similar applications (granite, solid surfaces, etc). This resistance and durability provides peace of mind in the kitchen.

Resistant to Scratching

Quartz has a hardness of 7 in the Mohs hardness scale (diamond is number 10). Therefore, whereas with the majority of other worktops, such as those made of granite or laminate, which can get scratched, with Silestone® no mark is left. Silestone® is highly resistant but should not be treated with reckless force, care needs to be taken with knife blades.

A Colour Series Made From Recycled Materials

The new ECO Line Colour Series is an innovative colours collection composed of more than 50% of recycled materials:

- ▶ Porcelain from tiles, sinks, toilets, and other similar products.
- ▶ Glass, windows, containers and glassware.
- ▶ Mirrors from dwellings, buildings and factories.
- ▶ Earthenware from reclaimed tiles.
- ▶ Vitrified ash and waste generated by blast furnaces and power generating processes.

Even 94% of the water used in its manufacturing process is re-used.

New colours that embrace sustainability, design and quality, they have produced a new category of recycled surfaces. These are an ecological alternative to similar surfaces available for construction and decoration.

Colours from ECO Line Colour Series have been created through a comprehensive research and development project carried out by the multinational company which has reinvested a major part of its annual income in promoting new technologies to create this state-of-the-art product.

All the manufacturing processes comply with high environmental standards; such as the Cradle to Cradle certification, that not only certify the product itself, but also everything involved in the production process.

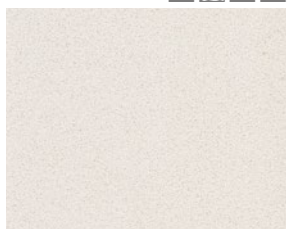

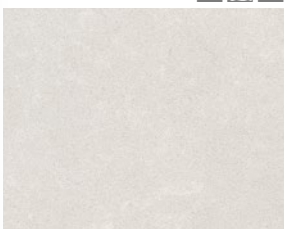

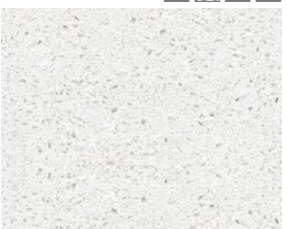

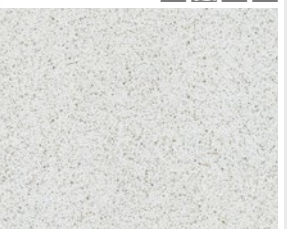

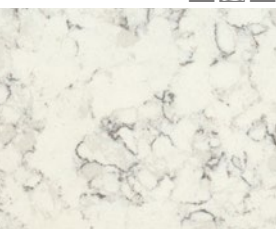

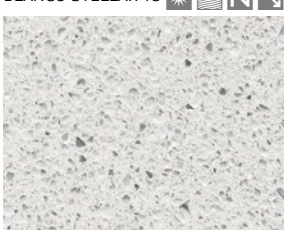

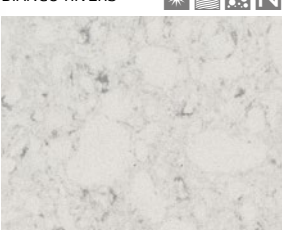

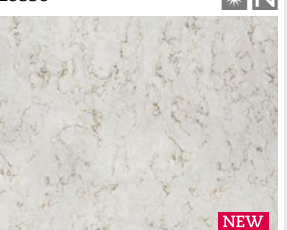

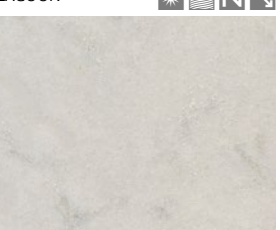

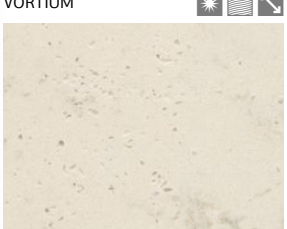

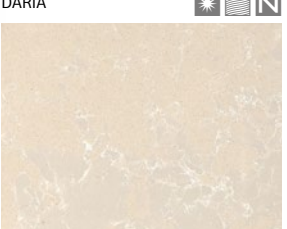

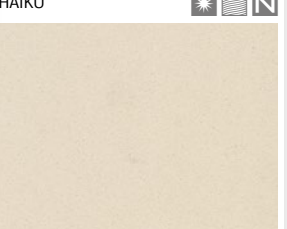

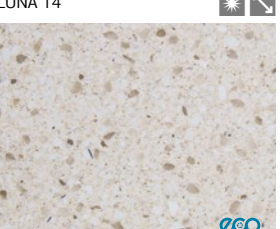

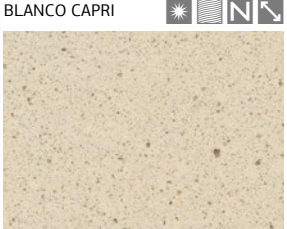

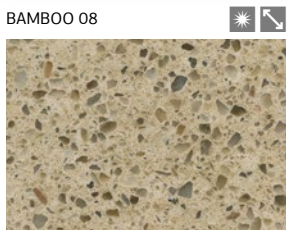

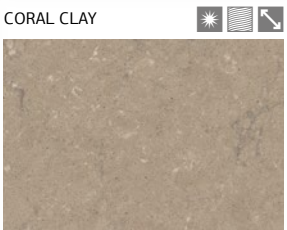

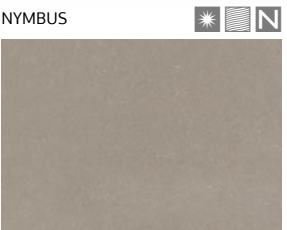

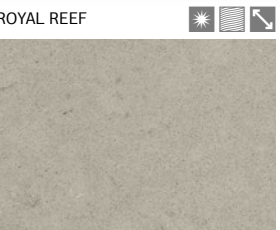

Colours can vary depending on the recycled materials that have been used in the composition of each surface.

Paper and ecological manufacturing standards are used for point of sale and promotional material of the product. Labelling adheres to the environmental and recycled products regulations.

Rafa Nadal & Cosentino

Silestone Premium + More Than a Symbol

Above all, Silestone® means capability, initiative, consistency, responsibility, development, experience... it is all this and much more.

It is a set of advantages that have made Silestone progressive brand, adapting the latest technologies in every way and for everyone.

It is a journey towards the future that we began many years ago, and which has made us an icon in constant re-evolution.

Colours & Textures

With more than 60 colours and three textures to combine: polished, matt or rough – the possibilities are endless. From the most modern designs to the most traditional, any idea can be brought to life.

Formats

We manufacture 3 thicknesses – 1.2cm, 2cm and 3cm – and two slab formats – 304cm x 138cm (Standard) and 325cm x 157cm (Jumbo – in limited colours). This enables us to offer larger sizes than anyone else with fewer joints.

Distribution

Reaching the entire world is becoming a reality. This is due to the huge manufacturing capacity of Cosentino® with 11 manufacturing lines and its network of Centers and distributors all over the world.

After-Sales Service

We place special emphasis on our after-sales service, as it is the most honest and effective means of providing greater added-value to our products. Our users can understand why the leader is always the first to evolve.

Variety

Our team of expert "quartz hunters" travel the world to find and choose different quartz varieties for the constant development of new lines to match the latest in interior design trends.

Sustainability

We are firmly committed to forging a better world through sustainable architecture and construction by providing high value products that improve energy efficiency without compromising the beauty of design.

Strength

After diamond and ruby, quartz is the hardest mineral known to man. This makes our products long-lasting and highly resistant to external aggressions.

Brand

Everyone wants to be called Silestone® to take advantage of our efforts and market leadership. But there is only one brand, the authentic and original Silestone® by Cosentino®.

Certifications

Greenguard

Silestone® is internationally certified to guarantee maximum hygiene and environmental protection.

NSF

This certification assures the low emissions of the chemical compounds to the air.

LGA

It assures the efficiency of the use of water systems and the control of environmental risks.

Rafa Nadal
Cosentino Brand Ambassador
